### Foot Operated Potentiometers

#### FOP-5K-10

An innovative product from PANKAJ

Foot operated potentiometer model **FOP-5K-10**, using our Short stroke conductive plastic potentiometers LCP-10 for linear control.

When you press the lever the switch operates first and then the potentiometer resistance varies, on releasing the lever the potentiometers resistance changes comes to its original position and the switch is put off.

Heavy duty aluminum casting body with special powder coating. 230 VAC 10 Amp 2NC+2NO switch to isolate phase and neutral. Short stroke conductive plastic potentiometer resistance value 1K, 5K or 10K Ohm which has gold plated PCB and gold plated wiper, low ppm resistive element with long life.

Application: - potentiometric control with hands free operation
