Pedal Operated Controller

POC-230 VAC 4 Amp.

PANKAJ Adds to the basket of our existing products

Pedal operated controller model:

POC-230 VAC 4 Amp, using our Short stroke conductive plastic potentiometers LCP-10 and electronics circuit.

When you press the lever, the switch operates first and as you go on pressing, the AC output increases linearly and smoothly, at full press the output is 100%.

When you start releasing the lever output decreases linearly and smoothly and when the lever is fully released the output is switched off.

Heavy duty aluminum casting body with special powder coating. 230 VAC 10 Amp 2NC+2NO switch to isolate phase and neutral. Short stroke conductive plastic potentiometer and reliable electronics components.

Application: - Smooth linear AC output control with hands free operation viz: Dimmer-light control, motor speed and many more
